

EXTRUDER E-1500

used for production of extruded feed in pellet form

RAW MATERIAL:

protein components
cereal crops
microadditives
fats

PURPOSE & USE:

- heating up with dry steam
- grinding and mixing
- heating up to 120...150 °C
- pellet formation
- product expansion
- decreasing in specific gravity
in 1,2...3 times

FINAL PRODUCTS:

sinking and floating
aquafeed pet food

ADVANTAGES:

- increases the protein
content in the feed
- helps to regulate
the specific weight of feed
- antinutrients and microorganisms
are deactivated

POWER:

97 kW

Capacity:

- for soybean processing, kg/hour: 1500
- for pelleted feed, kg/hour: 1000

Weight, kg: 4000
Length, mm: 2400
Width, mm: 2400
Height, mm: 2850
Steam consumption, kg/hour : 100
