

# PELLETS COOLER GC-1000

used to cool the pellets down

## RAW MATERIAL:

feed pellets  
fuel pellets

## FINAL PRODUCTS:

the already cooled pellets

## PURPOSE & USE:

- the raw material is fed to the cooler
- the fan created a flow of air through the hot pellets
- the already cooled pellets are discharged through the outlet gate

## ADVANTAGES:

- the pellets keep their form, no breaking down
- compact design

<b>Capacity , kg/hour:</b>	1500	<b>Length, mm:</b>	1910
<b>Temperature of the inlet product, °C:</b>	85	<b>Width, mm:</b>	1610
<b>Temperature of the final product, °C:</b>	40	<b>Height, mm:</b>	2510
<b>Power, kW:</b>	1.5	<b>Weight, kg:</b>	540
